

Eisenhower Chairman Honored

Harry M. Goldstein, Chairman of the Board and recipient of the Leadership in Governance Award, with G. Aubrey Serfling, President and Chief Executive Officer, Eisenhower Medical Center.

In honor of his commitment to health care and community, the California Hospital Association has announced it will bestow its prestigious Leadership in Governance Award to Harry M. Goldstein, Chairman of the Board at Eisenhower Medical Center.

The award recognizes the hard work and dedication of individuals along a continuum of service arenas — individuals who have demonstrated a commitment to health care policies and issues; who have met the increasing challenges facing health care organizations; who have shown an outstanding commitment to their communities; who have given exemplary service as active, informed and dedicated trustees; and who have provided leadership, strategic planning and support to their hospitals or health care organizations.

Since his election as Chairman of the Board at Eisenhower Medical Center in November 2000, Goldstein has exemplified such high levels of service as he enacted his vision of excellence in patient care at Eisenhower, and during his tenure, Eisenhower Medical Center was named a 100 Top Hospital®.
