Eisenhower First in Coachella Valley to Offer Cryoablation for Fibroadenomas

According to the National Institutes of Health, fibroadenoma is the most common benign tumor found in the breast. Typically, treatment for fibroadenomas either involves watchful waiting or surgery. For Coachella Valley residents, there is now another option - cryoablation, a non-surgical alternative to remove fibroadenomas and other masses. Click on the link below to be directed to an excellent article by *The Desert Sun's* Bethany Roessner regarding this new, innovative procedure.
